Lim Donghyun

Software Engineer

limdongxian1207@gmail.com
Portfolio | GitHub | Blog

Software Engineer with hands-on experience in AI/LLM integration, mobile app development, and full-stack product delivery. Built and shipped Perch to the App Store (500+ users, 100+ DAU) with RAG-based AI health features, and co-authored an LLM-based quantitative research paper accepted at APAF. Currently building AI-native products and marketing-agent pipelines at a Beijing-based startup using Harness Engineering.

Skills

Languages	Python, Dart, TypeScript, Swift, SQL
Frameworks	Flutter, FastAPI, React, Next.js, SwiftUI
AI / ML	PyTorch, LangChain, GPTQ/AWQ Quantization, RAG (pgvector), Computer Vision (YOLO)
Cloud / Infra	AWS (Amplify, Bedrock, Lambda, API Gateway, DynamoDB, S3), GCP, Supabase, Docker
Tools	Claude Code, Kiro (Harness Engineering), Git, Hugging Face, Figma

Education

B.S. in Computer Science, *Hanyang University* — Sep 2021 — Present (Senior)
Minor: Entrepreneurship Convergence | Micro-major: Industrial AI — GPA: 3.36 / 4.5
Key Coursework: Operating Systems, Database Systems, Computer Networks, Data Structures, Algorithms, Artificial Intelligence

Experience

Software Engineer Intern — **Jan 2026 — Present**
Cognitive Beyond (Beijing) Technology Co., Ltd. — *Remote*

- **Profita** — Co-designed a Marketing Agent pipeline (Creative, Distribution, Attribution, Monetization, Segmentation modules) for an AI-native ROAS engine targeting indie game devs; shipped interactive D0–D28 ROAS demo and Next.js marketing site
- **Daily-Fit** — Built a full-stack 28-day personalized fat-loss platform with 15–30 step onboarding quiz, async OpenAI workout/diet plan generation, and Shopify webhook payment integration
- **Zenmotion** — Delivered a Shopify Horizon v3.2.1 direct-response funnel (15 custom Liquid sections), automated deploy agent, AJAX cart, and full-funnel ecommerce event tracking

Undergraduate Research Intern — **Mar 2025 — Jul 2025**
Hanyang University Business School — Quantitative Analytics Lab — *GitHub | Seoul, Korea*

- Co-authored "Can ChatGPT Forecast Returns in the Korean Stock Market?" accepted at APAF Conference
- Analyzed ~500K Korean news articles using GPT-4.1 for sentiment-based stock trading strategies
- Achieved 11.91% cumulative return vs. KOSPI's -14.43% decline in backtesting evaluation

Activities & Projects

Perch — AI Pet Bird Health Platform — **2025 — Present**
CEO & Developer — *GitHub | perch.ai.kr*

- Co-founded and shipped Perch to the App Store; grew to **500+ registered users and 100+ DAU**; funded by Hanyang University Startup Support Center
- Built full-stack mobile app (Flutter MVVM + FastAPI + PostgreSQL/pgvector); RAG pipeline with `text-embedding-3-large` and SSE-streamed chat; GPT-4V image analysis for body condition, droppings, and food safety
- Designed proprietary **Bird Health Index (BHI)** analyzing weight, food, and water intake; supports KR/EN/ auto-locale with JWT + Google/Apple/Kakao OAuth
- Maintained 178/178 passing tests across the full codebase

HARU (Home Adaptive Routine Understanding) — LG Electronics IC-PBL — **Sep 2025 — Dec 2025**
LG Electronics X Software Engineering IC-PBL Course Project — *GitHub | Hanyang University*

- Built iOS + Apple Watch app (SwiftUI/watchOS, FastAPI, Supabase) for LLM-based smart home automation in a 4-member team
- Real-time fatigue analysis: Apple Watch HRV → XGBoost fatigue level (1–4) → GPT-4o appliance control suggestions via Sendbird chat
- Implemented 100m geofence + distance pattern detection for auto-trigger; delivered final prototype demo to LG Electronics panel

Awards

- **Grand Prize**, Hyundai NGV HYPER AI Hackathon — GitHub | Jan 2026
- **Excellence Award**, AWS KIROTHON Hackathon — GitHub | Mar 2026
- **1st Place**, FORIF Hackathon Ideathon — Hanyang University Programming Club — Dec 2025
- **3rd Place**, Hyspark Demo Day Challenge Track — Hanyang University Startup Club — Jul 2025
- **2nd Place**, Hanyang Cryptography Competition — Oct 2025
